13 July 2009

Dear Mr Arto Sakko,

## Outcome of the Spring 2009 ETSF evaluation of proposals

Thank you for your proposal for a project entitled “Implementation of the multiresolution method for the calculation of inner-shell excitations on OCTOPUS”.

All projects proposed have now been reviewed by the External Evaluation Panel of the European Theoretical Spectroscopy Facility (ETSF), and the Steering Committee has allocated resources accordingly. I am happy to inform you that your proposal has been recommended for ETSF training. You are invited to spend some time at an ETSF node to receive this dedicated training, which will itself be free of charge. Please note that any student travel and subsistence costs will not be funded.

The dedicated training will be done by ETSF scientists from the ETSF's San Sebastián node (specifically, CSIC, University del País Vasco). The ETSF scientists in charge of your project will be Xavier Andrade ([xavier@tddft.org](mailto:xavier@tddft.org)) and Angel Rubio ([arubio@sc.ehu.es](mailto:arubio@sc.ehu.es)). They will contact you shortly to take the project forward.

This offer is subject to conclusion of any legal agreement which you or the ETSF member institution(s) with which you will engage may require.

I hope this decision meets your approval and look forward to a successful engagement.

Yours sincerely,

Lucia Reining  
(ETSF Vice President for Users and Technology)
