Dear Dr Perez,

Outcome of the Autumn 2009 ETSF evaluation of proposals

Thank you for your proposal for a project entitled "Rotaxane Devices based on Carbon Nanotubes".

All projects proposed have now been reviewed by the External Evaluation Panel of the European Theoretical Spectroscopy Facility (ETSF), and the Steering Committee has allocated resources accordingly. Although your proposal was evaluated positively, it was not among those that the panel has ranked highest and hence that could be carried out within the available resources for this selection round. The Evaluation Panel, however, gave indications concerning improvements and recommended that these be discussed with ETSF scientists with a possibility to resubmitting the proposal in time for the next evaluation in Autumn 2009. If a meeting is useful for this purpose, the ETSF will endeavour to give financial support for it.

The ETSF scientist who will contact you shortly about this possibility is Angel Rubio (arubio@sc.ehu.es).

I hope this decision meets your approval and look forward to successful discussions.

Yours sincerely,

Lucia Reining
(ETSF Vice President for Users and Technology)

The ETSF is supported by Framework Programme 7
of the European Union.
