Dear Prof. Romero,

## Outcome of the ETSF evaluation of training proposals

Thank you for your proposal for a project entitled “Electronic and optical characterization of TiO<sub>2</sub> clusters”.

All training projects proposed have now been reviewed by the Internal Evaluation Panel of the European Theoretical Spectroscopy Facility (ETSF), and the Steering Committee has allocated resources accordingly. I am happy to inform you that your proposal has been recommended for ETSF training. You or one of your students are invited to spend some time at an ETSF node to receive this dedicated training, which will itself be free of charge. Please note that any student travel and subsistence costs will not be funded.

The dedicated training will be done by ETSF scientists from the ETSF's San Sebastián node (specifically, the Nano Bio Spectroscopy Group of the University del País Vasco and CFM-CSIC-UPV/EHU). The ETSF scientist in charge of your project will be Angel Rubio ([arubio@sc.ehu.es](mailto:arubio@sc.ehu.es)). He will contact you shortly to take the training forward.

This offer is subject to conclusion of any legal agreement which you or the ETSF member institution(s) with which you will engage may require.

I hope this decision meets your approval and look forward to a successful engagement.

Yours sincerely,

Lucia Reining

(ETSF Vice President for Users and Technology)

The ETSF is supported by Framework Programme 7  
of the European Union.
