18 January 2010

Dear Dr Grüneis,

Outcome of the Autumn 2009 ETSF evaluation of proposals

Thank you for your proposal for a project entitled “The metal-insulator transition in hydrogenated graphene studied by angle-resolved photoemission spectroscopy and ab-initio calculations”.

All projects proposed have now been reviewed by the External Evaluation Panel of the European Theoretical Spectroscopy Facility (ETSF), and the Steering Committee has allocated resources accordingly. I am happy to inform you that part of your proposal has been accepted and will be carried out within the limit of the available resources.

Part of the work on the proposed project will be done in collaboration with ETSF scientists from the ETSF's San Sebastián node (specifically, the Nano Bio Sepctroscopy Group of the University del País Vasco and CFM-CSIC-UPV/EHU) and Rome node (specifically, the University of Rome Tor Vergata). The ETSF scientists in charge of your project will be Angel Rubio (arubio@ehu.es) and Olivia Pulci (Olivia.Pulci@roma2.infn.it). They will contact you shortly to take the project forward.

This offer is subject to conclusion of any legal agreement which you or the ETSF member institution(s) with which you will engage may require.

I hope this decision meets your approval and look forward to a successful collaboration.

Yours sincerely,

Lucia Reining
(ETSF Vice President for Users and Technology)

The ETSF is supported by Framework Programme 7
of the European Union.
